About Us- "Empowering Laboratories with End-to-End Expertise"

"Pharma-Sources LabTech" is an women empowered initiative and "one stop solution.

Your "trusted partner" for **integrated laboratory, quality, and compliance solutions**. We provide a comprehensive portfolio of **"laboratory equipment", "analytical LAB-consumables", "certified standards", "calibration solutions", "technical consultancy", and "regulatory support"** tailored to the pharmaceutical, biotechnology, healthcare, and research sectors.

Driven by industry expertise and a commitment to excellence, we help organizations enhance laboratory performance, maintain regulatory compliance, optimize operational efficiency, and accelerate innovation through reliable, customized, and value-driven solutions.

**Reliable Solutions for Quality, Compliance, Calibration, Laboratory Services,
and Technical Excellence.**

Why you choose us

Our Mission

To provide high-quality products and assure your compliance through innovative, reliable quality and technology solutions.

Our Vision

To be the one stop solution accelerating your journey towards innovative and sustainable growth.

Our Scientific principles & Core Values make us apart from others

Making a Difference

Our dedication to excellence in on-time delivery and prompt customer service

Quality Matters

Committed to delivering excellence in every product, process, and service

Keep it Human

Collaborate with empathy, transparency, and authenticity, people are at the heart of what we do

Go Beyond

Push boundaries to ensure superior quality, compliance, and continuous improvement

PRODUCTS

High-quality pharmaceutical, laboratory consumables, instruments, chemicals and more for every need.

TECHNICAL SUPPORT

Expert guidance, validation, calibration and compliance assistance to ensure quality and regulatory excellence.

ONE-STOP SOLUTION

End-to-end solutions for pharmaceutical and laboratory needs – Products, Support and Services under one roof.

Quality Solutions- Value driven Quality

We support pharma, research, manufacturing, and supply chain sectors with reliable systems and compliance-focused solutions. Our services ensure smooth operations from development to distribution.

Whether you require support with a **one-off task**, or you are looking to engage an **external Quality department**, we have the knowledge, expertise and personnel to curate and deliver the perfect solution.

We work with Pharmaceutical and Biotechnology clients to help them meet global regulatory authority quality expectations on **Good Manufacturing Practices** for medicinal products and medical devices.

We have an extensive team of experienced and trusted Quality professionals, meaning we can always provide the “**Right person for the Right task**”.

SELECT THE SERVICES BELOW TO FIND OUT MORE ABOUT WHAT WE OFFER.

	CRO/CDMO	Clinical & Development Support
	SYNTHETIC R&D	Research & Formulation
	CMO	Contract Manufacturing
	PHARMA/API	Drug & API Production
	DRUG PRODUCT	Finished Product Manufacturing
	FILL FINISH	Packaging & Filling
	LOGISTICS	Transport & Storage
	SUPPLY CHAIN	Distribution Network
	IT VALIDATION	System Validation
	WAREHOUSE	Storage & Compliance

GMP Audit & Quality Compliance Services

Regulatory inspections demand robust quality systems, complete documentation, and consistent compliance. Even minor deficiencies in GMP practices, quality management, or documentation can lead to critical observations, product release delays, regulatory actions, and business disruptions.

Pharma Source LabTech provides comprehensive **GMP Audit & Regulatory Compliance Services** to pharmaceutical, biotechnology, API, CRO/CDMO, medical device, and life sciences organizations. Our experienced quality professionals conduct independent, risk-based audits aligned with **USFDA, MHRA, EU GMP, WHO GMP, PIC/S, ICH guidelines** and **ISO17025** to evaluate manufacturing operations, quality systems, laboratory controls, and supply chain compliance.

Our structured audit approach identifies compliance gaps, strengthens quality systems, enhances operational excellence, and prepares organizations for successful regulatory inspections through practical, evidence-based recommendations and sustainable compliance solutions.

Temperature Mapping & Thermal Validation Services

We provide comprehensive **Temperature Mapping and Thermal Validation Services** to ensure controlled environments consistently maintain specified temperature conditions in compliance with **WHO, GMP, GDP, NABL, and regulatory guidelines**. Our validation studies help organizations protect product quality, maintain regulatory compliance, and optimize storage and distribution performance.

Warehouse Temperature Mapping

Ensuring uniform temperature distribution across warehouses to maintain product quality and regulatory compliance.

Cold Room, Deep Freezer & Cold Storage Mapping

Validating temperature-controlled storage systems for consistent performance and product integrity.

Stability Chamber Temperature Mapping

Verifying thermal uniformity and chamber performance for reliable pharmaceutical stability studies.

Transportation & Cold Chain Mapping

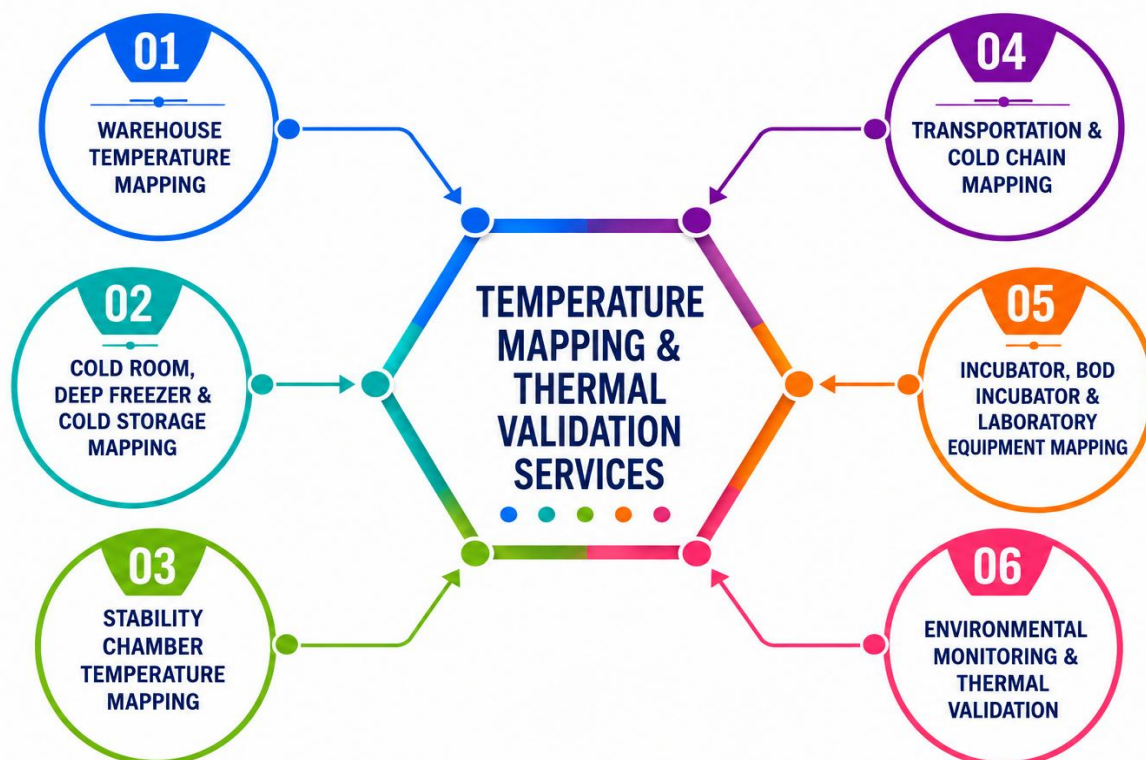

Assessing temperature-controlled transport systems to ensure uninterrupted cold chain compliance.

Incubator, BOD Incubator & Laboratory Equipment Mapping

Qualifying laboratory equipment to confirm consistent temperature distribution and operational reliability.

Environmental Monitoring & Thermal Validation

Monitoring and validating controlled environments to support GMP compliance and product quality assurance.

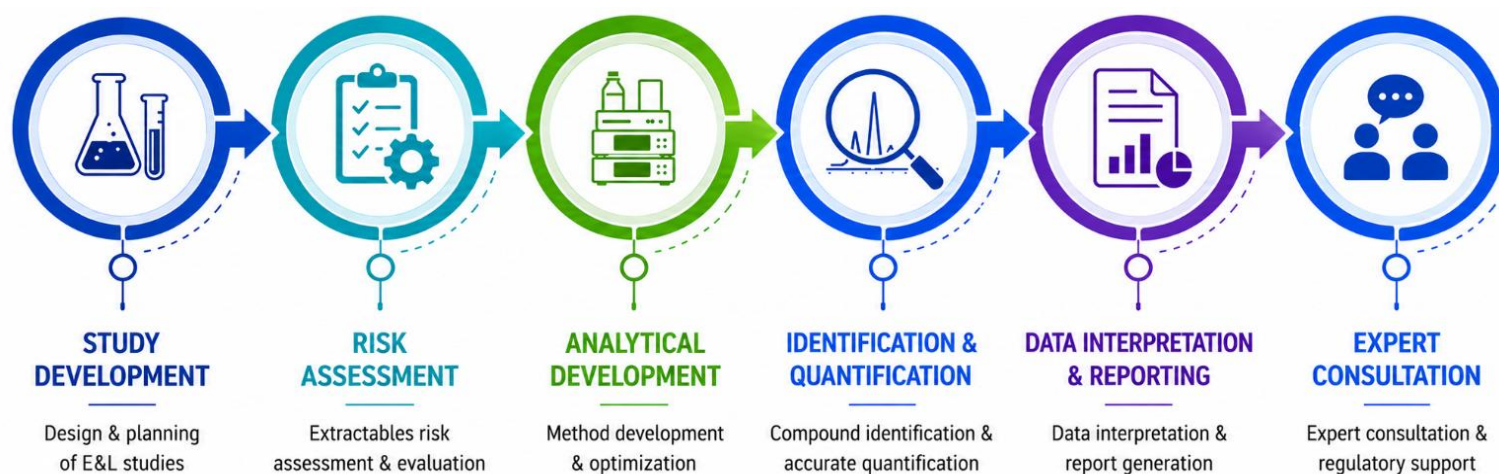

○ Development & Quantification insights of E&L studies/Expert consultation

We offer specialized consultation for Extractables & Leachable (E&L) studies, supporting the identification, development, and quantification of potential contaminants arising from packaging materials and manufacturing components. Our consultation ensures compliance with regulatory expectations while maintaining product safety and quality.

Expert panel having “**17 years**” of experience and lead teams in Global MNC s on this TOPIC.

Our experts assist in study design, risk assessment, analytical method selection, and data interpretation, enabling accurate evaluation and control of E&L risks throughout the product lifecycle.

○ Data Review, Protocol Design & Technical Documentation Support

Our goal is to help emerging laboratories reduce development time, improve documentation quality, strengthen compliance, and confidently progress from laboratory setup to regulatory readiness.

We partner with emerging laboratories, start-ups, CROs, pharmaceutical, API, formulation, and analytical laboratories by providing end-to-end scientific documentation and technical consulting services. Our experienced experts assist organizations in developing robust, regulatory-compliant documentation that accelerates laboratory readiness and operational excellence.

We help **newly established and growing laboratories** build strong technical foundations by providing:

- Ready-to-use, regulatory-compliant document templates, Expert review of analytical and formulation data.
- Customized protocol development for R&D and QC laboratories. Scientific interpretation and troubleshooting support.

"Empowering Emerging Laboratories with Scientific Expertise, Robust Documentation, and Regulatory Excellence."

Professional Upskilling, Training & Certification Programs

Pharma Source LabTech delivers industry-focused training programs designed to strengthen technical expertise, regulatory knowledge, and professional competencies across pharmaceutical, biotechnology, healthcare, and laboratory sectors. Our practical learning approach equips professionals with the skills required to meet current industry standards and regulatory expectations.

Competency Mapping & Career Development

We help organizations identify workforce capabilities, bridge competency gaps, and develop structured career progression frameworks. Our competency mapping solutions align employee skills with organizational objectives, enabling continuous professional development and improved business performance.

NABL Calibrations (In approvals)

○ Mass Calibration

Precision calibration of weighing instruments and mass standards, including analytical balances, precision balances and standard weights, with traceability and measurement accuracy.

○ Volume Calibration

Accurate calibration of volumetric equipment such as micropipettes, pipettes, burettes, volumetric flasks and measuring cylinders, supporting reliable laboratory measurements.

○ Thermal Calibration

Calibration of temperature measuring instruments and thermal equipment including RTDs, thermocouples, temperature indicators, ovens, incubators, water baths and stability chambers.

MASS CALIBRATION

Precision calibration of weighing instruments and mass standards ensuring maximum accuracy and reliability.

- ✓ Standard Weights (E1, E2, F1, F2, M1)
- ✓ Analytical Balances
- ✓ Precision & Top Pan Balances
- ✓ Platform Scales & Weighing Systems

VOLUME CALIBRATION

Accurate calibration of volumetric equipment for consistent and reliable liquid measurements.

- ✓ Micropipettes & Pipettes
- ✓ Burettes
- ✓ Volumetric Flasks
- ✓ Measuring Cylinders
- ✓ Dispensers & Bottle Top Dispensers

THERMAL CALIBRATION

Calibration of temperature measuring instruments and thermal equipment across wide ranges for process safety and compliance.

- ✓ RTDs & Thermocouples
- ✓ Temperature Indicators & Transmitters
- ✓ Ovens, Incubators & Water Baths
- ✓ Stability Chambers, Refrigerators & Freezers
- ✓ Autoclaves & Furnaces

Our Focus:

Accuracy • Traceability • Measurement Uncertainty • ISO/IEC 17025 Compliance

Pharma & Laboratory Equipments & Consumables

High-quality instruments, equipment, and consumables for reliable lab performance and efficiency.

Integrated Quality Systems & Scientific consulting services

End-to-end quality solutions, compliance support, and scientific expertise to drive excellence.

Building skills, Capability & Leadership Excellence.

Empowering individuals and teams through training, development, and leadership programs.

Your Trusted Partner for End-to-End Laboratory, Quality & Technical Solutions
